

The variety of Tx. methods for Extra Vessels

1. Retaining MP needles
(Gold and Stainless)
1. Applying +pointed and flat-side Magnet
2. Applying gold and silver spheres
3. Direct moxa using sesame size cones
4. Warming moxa (chinetsu-kyu)
5. e-Q (non-fire Moxa tx)

Plus and Minus

	Effect of plus	Effect of minus
Acu	Gold	Stainless
	Copper (P needle)	Zinc (M needle)
Moxa	5 cones	3 cones
	3 cones	2 cones

Tester Magnet

Tester dissimilar metal

MP needle

Copper-Zinc spheres

e-Q (Non-fire Moxa tx.)

Corresponding symptoms and diseases (1)

- Disorders of the Cranial-nervous system
The sequelae of an intracerebral bleeding event or a CVA, Parkinsonism, eye problems, etc.
- Disorders of the face area
A headache, facial paralysis, a trismus dolorificus, ear, nose, dental disease
- Disorders of the Chest
Heart disease, asthma, cough, intercostal neuralgia, etc.
- Disorders of the Upper abdomen
Stomach illness, liver disease, pancreatitis, etc.

Corresponding symptoms and diseases (2)

- Disorders of the Lower abdomen
Bladder disorder, gynecological problems
- Disorders of the upper and lower limbs
Pain of frozen shoulder, elbow, knee,
inflammation of a tendon sheath, etc.
- Disorders of the autonomic nervous system
Vertigo, insomnia, palpitations, SOB, etc.
- Chronic or intractable diseases

(Advanced version)

Confirmation methods of EV diagnosis
even by EV Abdominal examination

1. Loosening the stiffness of the neck shoulder
2. The luster of the skin such as on the abdomen improves.
3. Pulse quality dx., in particular the Floating-Sinking and Deficient - Excess are becoming even on left and right.

Contraindication

1. Diseases with fever (ex. high fever from Cold)
2. Fast pulse
 1. Indicates the need for caution; a fast pulse such as a cancer patient might have, can be effectively treated depending on the treatment method

Tx. style in Hari Ac-clinic

Standard type:

1. Questionnaire · check the medical record
2. Patient changes into gown
3. Interview, confirmation of pain in movement for locomotorium disease.
4. Supine position on bed
5. Confirm the pattern of EV.
6. Palpation Dx. ① Area of chief complaint and other ② Abdominal Dx. ③ Pulse Dx.
7. Root Tx.
8. Local Tx.
